

Molecular Ecology & Evolution Seminar Series

Environment Centre Wales Autumn 2018

Thu 18th Oct

Identification, ecology, and function of armillaria species on oak in Chestnut Wood, Forest of Dean

Mallory Diggins – School of Natural Sciences, Bangor University

Thu 25th Oct

Detecting threatened fish communities in a river system using eDNA

Dr. Jennifer Shaw - Land and Water Business Unit,
Commonwealth Scientific and Industrial Research Organisation

Thu 1st Nov

Testing the role of epigenetics in ecological speciation of cichlid fishes

F16 Memorial

Prof. George Turner – School of Natural Sciences, Bangor University

Thu 15th Nov

Lighting up the Night- Ecological Impacts of Artificial Lighting on Anurans

Alexander Harcourt – School of Natural Sciences, Bangor University

Thu 29th Nov

Microscope or MinION? Identifying allergenic tree pollen from eDNA air-samples

Anna Egerton – School of Natural Sciences, Bangor University

Thu 13th Dec

Thumbing a ride: the extent of hitchhiking in the *Arabidopsis thaliana* genome

F16 Memorial

Dr. Thomas Brekke – School of Natural Sciences, Bangor University

11:00 ECW ground floor seminar room, join us for coffee & cake at 10:45
